STUDENTS ... VITIES

- **ECONOMETRICS 2 (MICROECONOMETRICS)**
  - **FANKHAUSER**
    - Martin is very nice and competent. He truly likes metrics and this helps engage.
      I think his answers to some questions from students could be slightly clearer, but overall I had a great time during the TA sessions. The topics in the additional lectures were great too!
    - Kind and approachable, but not very good at pacing the lecture well or reading the room as to whether people are following. He has a great grasp of the material, but not the best at imparting that understanding to the class. Could be due to limited time. Otherwise, lovely TA, very nice and easy to ask doubts to.
- **ECONOMETRICS 3**
  - **FANKHAUSER**
    - Martin is great! He is very passionate about the topic which is inspiring.
